Hadii Omar discovered the Coffee berry in Arabia. The virtues of Coffee, at once spread over the earth, because the only Coffee known was **GOOD COFFEE**. But, when Coffee got to be a regular thing, mans "Cleverness" began to see bigger profits in the harsher, cheaper and more easily cultivated types, that accounts for "bad" Coffee. How many know that there are seventy obtainable types of Coffee, and that only by the proper blending and proper, roasting of certain types can you get the best result in your Cup, such as is produced by

The Secret of Youth

Do you ever wonder how you can remain young, or why other women older than you, look younger than you do? The secret can be put in a few words: "Preserve your health, and you will preserve your youth." By "health" we mean not alone physical health, but nerve health, as, sometimes, magnificently strong-looking women are nervous wrecks. But whether you are weak physically or nervously, you need a tonic, and the best tonic for you is Cardui. It builds strength for the physical and nervous systems. It helps put flesh on your bones and vitality into your nerves.

Take CARDUI
The Woman's Tonic

"My mother," writes Mrs. Z. L. Adcock, of Smithville, Tenn., "is 44 years old and is passing through the change of life. She was irregular and bloated and suffered terribly. My father stepped over to the store and got her a bottle of Cardui, which she took according to directions and now she is up, able to do her housework and says she feels like a new woman." Try Cardui in your own case.

RAILROAD FARE PAID BOTH WAYS.

PUBLIC SCHOOL TEACHERS.

You teach from six to nine months in the year, spend your small savings attending a summer normal and hunting a position for the following year. Salaries stop, expenses go on. Your work is the hardest, the least appreciated; it affords no home; the state does not appreciate your services to the extent that it will pay you what you could earn in the business world. Let us train you for the business world. We have positively the largest annual enrollment in bookkeeping, shorthand and telegraphy of any commercial school in America; we have more and better teachers than any other commercial school in America; we are the only commercial school in America to own and occupy two large buildings, containing 320,000 equipment; we are the only business college in America to use its own copyrighted systems of bookkeeping, shorthand grammar, spelling, writing, typewriting etc. We graduate and put in good positions more students each year than any other American business college. We have a higher course of training than any other American business college; we use and teach more modern office appliances than any other American business college; we are more thorough and exacting in our work than any other American business college.

We will pay a teacher's railroad fare both ways if upon investigation of our school in person he does not find that we make good every claim made in our catalogue, and we acknowledge that we claim more than any other American business college, and what we want is an opportunity to prove to every teacher that we are prepared to turn out a more valuable man or woman for the business world than any other American business college, and do it in almost half the time and at half the cost of other schools using other systems and methods. Our enrollment of 1500 students annually comes from the best homes of over half of the states in the Union.

Fill in the following blank, mail to the Tyler Commercial College, Tyler, Texas, and receive catalogue, read carefully what teachers of years of experience say of the advantage our school was to them in entering the commercial field. Many who enrolled with us two or three years ago with barely money enough to pay for the course, today own comfortable homes and are conducting successful business. Every statement made in our catalogue is backed by a cash guarantee of \$100 to be true and correct:

State Insurance Board—Bulletin

It is admitted by students of the question of Fire Insurance and its relation to the public, that insurance has many of the elements of taxation by government, and in the final analysis, that the insurers pay the losses through the medium of the insurance companies, and that in order to reduce rates charged for insurance in this State, we must reduce the fire waste.

The mission of the state insurance board law is to secure just and reasonable fire insurance rates and in working to that end the board should have the hearty co-operation of every citizen of Texas interested in the matter of fire insurance. The law creating the board provides for a State Fire Marshal and defines his duties. The State fire marshal is charged with the task of investigating all fires of incendiary origin, and to make reports of such investigation to the county or district attorney of the counties wherein fires occur, and to perform other services calculated to diminish the fire hazard.

At an early date this board will urge every incorporated city and town in Texas to enact a fire marshal ordinance, copies of which will be furnished by the board, creating the office of city fire marshal. This will prove a most important step in the direction of fire prevention. The services of an active city fire marshal will secure for any city or town a substantial reduction of insurance rates.

It is believed that when the public once realizes its relation to the fire waste of this state and its remedies, this board will receive the hearty and active co-operation of every citizen of Texas in an effort to reduce loss by fire, and thereby reduce the insurance rates.
